PROJECT	

FEATURES

- Includes a 6" International Symbol of Accessibility or Dynamic Symbol of Accessibility.
- Long life nickel cadmium maintenance free battery provides the required 90 minutes of emergency operation.
- Solid state transfer relay uses no relay contacts to reduce oxidization and failure in order to ensure reliability.
- An electronic control circuit and an isolation transformer provides current control and circuit protection for high output, energy efficient LED technology.
- Line-latch prevents unnecessary discharge of battery during installation. Loads will not illuminate until after application of utility power.
- Brownout detection ensures emergency operation during periods of low line voltage.
- LED indicator is used to indicate AC presence.
- A push-to-test switch can be used to test the emergency operation.
- 120/277 VAC with field selectable inputs.
